Brainstorm & Idea Prioritization Template:

Moving from a messy brainstorming session to a clear, actionable roadmap requires a structured way to sort your concepts. Visualizing your tasks or features helps align teams instantly.

The three framework templates below help you sort, rank, and prioritize your ideas:

When a simple visual matrix is too subjective, teams use Weighted Scoring Matrices. This technique grades ideas against pre-determined business metrics (such as customer demand, revenue potential, alignment with goals, and technical feasibility).

Quick wins
Correct a design flaw that puts the construction at risk.
Make small changes before submitting a design right before the deadline.
Major projects
Research designs to draw inspiration for new projects.
Read about the use of new materials for a new design.
Prepare report for the upcoming meeting with the client.
Fill-ins
Contact contractors, get tickets to visit the landscape of the next design.
Write budget proposal.
Thankless tasks
Complete some administrative tasks.
