Customer Problem Statement Template:

A problem statement is a concise, clear description of an issue or opportunity that needs to be addressed. It identifies the gap between the current state (what is happening) and the desired future state (what should be happening). Widely used in business, research, and user experience (UX) design, its primary purpose is to align teams, clarify scope, and secure stakeholder buy-in before jumping into creating solution

To define a problem accurately without prematurely suggesting a solution, teams often leverage the 5 Ws framework:
