Problem – Solution Fit Template:

A problem-solution template is a structured, visual framework designed to help individuals or teams clearly identify an issue, analyze its root causes, and map out actionable solutions. By converting complex or abstract hurdles into a concrete, step-by-step format, these templates eliminate guesswork and streamline collaboration.

Purpose:

- ❑ Solve complex problems in a way that fits the state of your customers.
- ❑ Succeed faster and increase your solution adoption by tapping into existing mediums and channels of behavior.
- ❑ Sharpen your communication and marketing strategy with the right triggers and messaging.
- ❑ Increase touch-points with your company by finding the right problem-behavior fit and building trust by solving frequent annoyances, or urgent or costly problems.
- ❑ **Understand the existing situation in order to improve it for your target group.**
